SUBJECT INDEX TO VOLUME 3

Casing performances in centrifugal slurry pumps, 65

Dust deflagration behavior for application to vent relief design, 159

Free shear flows, particle dispersion by coherent structures in, 149

Gravity and electrostatic effects, interaction of, 127

Kinetics of solution droplets in a continuously mixed chamber, measurement of, 37

Locked particles, liberation of target material from, 15

Mill noise parameters, indications of grinding mill operations by, 49

One-dimensional unsteady pneumatic transport, improved numerical method for, 191

Particle electrophorectic mobility, in nonpolar liquids, field dependence of, 115

Periodicity and fine structure, in two-dimensional random packing, 89

Random dispersions of equal spheres with a coagulation radius, size distribution of clusters inherent in, 27

Room-type air cleaners, design criteria and prototype performance, 179

Submicron magnetic particle separation, 101

Turbulent multi-phase flow, hydrocyclone model in consideration of, 1
